

Maple Leaf Motif

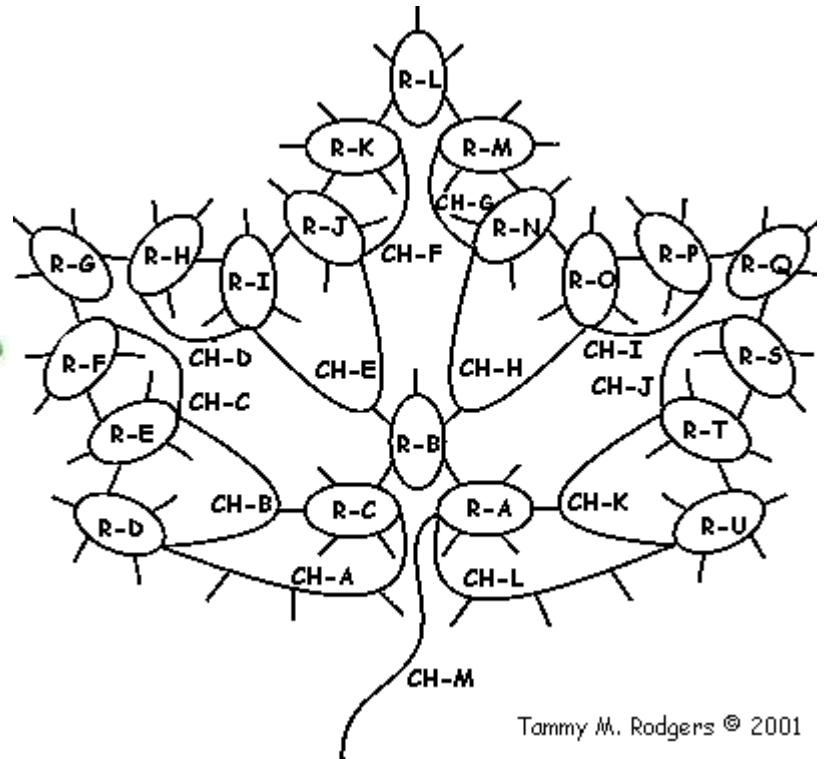

Diagram 1

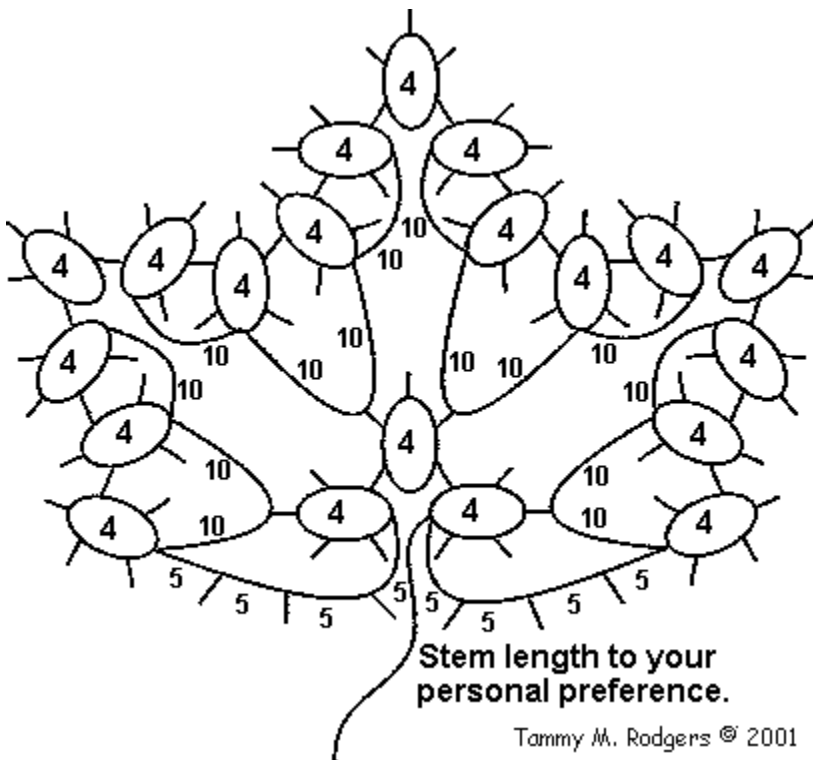

Diagram 2

These are my diagrams for the Maple Leaf Motif found in February 1975 Workbasket, page 57. I have made corrections to the pattern and added a leaf stem.

Ball and shuttle wound in CTM are used. Start with ring R-A as shown in diagram 1, use the DS count shown in diagram 2. Reverse work between ring/chain and chain/ring *except* when going from ring R-C to chain CH-A and ring R-U to chain CH-L.
