

The Denali Snowflake

R 3 - 12 -(very small) 3. Leave no space.

R 3 + 12 -(very large ½" diameter as it will be used for 5 joins) 12 -(very small) 3. Leave no space.

*R 3 + 12 - 3. RW

CH 3 +(shuttle join to last picot made on cloverleaf) 14 - 3. Do not turn.

R 3 -(join to last picot on chain) 12 -(very small) 3. Leave no space.

R 3 + 12 - 12 -(very small) 3. Leave no space.

R 3 + 12 - 3. Do not turn.

CH 3 + (join to last picot made on cloverleaf) 14 - (an inward facing picot) 3. RW

R 3 +(join to last picot on chain) 12 -(very small) 3. Leave no space.

R 3 + 12 +(join to large picot of initial cloverleaf) 12 -(very small) 3. Leave no space. Repeat from * for a total of six points on the snowflake.

Join last chain to bottom of initial cloverleaf. Bring ends to back. Glue or whip stitch to back. Trim ends. Spray with starch or use fabric stiffener and pin out on blocking board. Be sure to blot away any excess starch and begin pinning at base of initial cloverleaf and go around the center before pinning out the points.

When tatted with size 12 thread this pattern uses about 15 yards and makes a snowflake approx. 3½" in diameter. Georgia Seitz ©1993
