## Owl on a Paper Clip © Ellen Lai, Jul 2009

Material: Size 20 or 30 thread in CTM, wind onto 2 shuttles

1 large paper clip

Very small amount of felt and glue

A pair of plastic eyes

The sample was tatted with Atin Basak size 50 thread,

with 7 mm eyes.

## Starting with the wing.

Start chain with a small paper clip in order to hold the chain.

Chain: 9 ds, small picot, 4 ds, lock stitch (ie. 1st half of the ds

unflipped to form the tip of the wing), 18 ds

Remove paper clip and join to this space.

## Moving on to the head, using pearl tatting:

Add a double thread as the core thread for the following pearl tatted chain:

On the outside curve	On the inside curve	Remark
8 ds	6 ds,	
	long picot approximately 5/8" in length horizontally,	The long picot will form the brow for the owl.
	2 ds	
Lock stitch,	6 ds,	The lock stitch will form the
9 ds, small picot,	join to the long picot,	sharp point of the ear.
2 ds, small picot,	5 ds,	
1 ds	join to the start of the pearl tatting.	This completes half the head.
1 ds,	3 ds	This is a short neck to bridge
join to last picot of the pearl tatted chain of the head,		to the 2 <sup>nd</sup> half of the head.
1 ds, small picot,		
1 ds		
1 ds,	5 ds,	Start of 2 <sup>nd</sup> half of the head
join to the last picot of the bridging neck chain,		
2 ds,		
join to corresponding picot on the other half of the head,	long picot approximately 5/8" in length horizontally,	The long picot will form the brow for the owl.
9 ds.	6 ds.	

On the outside curve	On the inside curve	Remark
Lock stitch,	2 ds,	The lock stitch will form the
8ds	join to long picot,	sharp point of the ear.
	6 ds,	
	join to the end of the bridging neck chain.	This completes the 2 <sup>nd</sup> half of the head.

Don't cut off the core thread. I continue the normal chain for the body using 3 threads as the core thread (2 are the core thread used for the pearl tatting and 1 of the shuttle thread).

Chain: 18 ds

[Tie to paper clip by pulling up ball thread and passing shuttle through the loop.

Tighten up and make sure it does not flip around the clip, make second half ds.

Repeat tie one more time.]

Chain: 3 ds

Repeat [ ].

Chain: 8 ds

Cut & tie to picot on the wing. You can sew or glue the threads ends to the back. Block the owl first if necessary.

Now glue the owl onto the felt, leave to dry and cut it out.

Cut a small triangle for the beak, and 2 layers as feathers for the body and glue on.

Glue on the eyes.
