GENERAL INSTRUCTIONS

Be sure to use good crochet cotton. It is a waste of time and money to use poor materials, and no matter how well the work is done the finished piece is not handsome. Handwork is worthy of the best.

SIZE OF ARTICLES

It is seldom that two workers attain the same result from the same directions even when using the same size cotton, and for that reason it is best to choose the pattern for your article, and then the designs shown in this book may be adapted to any size, by adding to or omitting a sufficient number of rows or by using a finer or a coarser thread. Wherever possible and practicable, we have given sizes of thread and of the article.

TO WIND AN ORDINARY SHUTTLE EASILY

Take shuttle in left hand with one point caught under the nail of the middle finger and the point at the other end of shuttle caught under the nail of thumb; double the forefinger, press with it against the middle of the shuttle, pulling back with middle finger and thumb, thus spreading apart the ends of the shuttle, when the thread may be wound as easily as winding a ball.

Josephine knot: A ring formed of single stitches, like the first half of a d st; it may be of four to twelve stitches.

Continuous thread: Thread unbroken between shuttle and ball.

Reverse: Turn the work, and continue as before, but in an opposite direction.

Sets of stitches used in making tatted cord: 4-4, or other numbers, are single stitches of the stated number, like the first half of a d st; then the same number of single stitches, like the last half of a d st; this is one set of stitches.
