TERMS AND DIRECTIONS.

A Loop, written L; 2 Loops, written 2 L, and so on.

Single stitches—Are formed in two ways: First, by letting the thread of the shuttle with which you are working fall over the back of the hand and pushing the shuttle from you. Secondly, by letting the thread of the shuttle with which you are working fall over the palm of the hand, and putting the shuttle through towards you. These two stitches worked together alternately make a Double stitch. But if the second be worked first and the first second, alternately, it makes a Reversed Double. This is used for the purpose of making all the work have a right and wrong side.

2 Threads—When 2 threads are used, twist the one with which the stitches are to be made round the little finger, and proceed as above.

Double stitch, written D; 2 Double stitches, written 2 D, &c.

Reversed Double stitch, written R D; 2 Reversed Double stitches, written 2 R D, &c.

Loops—Are made by putting the thread with which double stitches are made over a pin, and there must be one or more Double stitches between each loop. By holding the pin point towards the right hand, between the forefinger and thumb of the left, the thread can be lifted over by the 2nd finger of the right hand, and many loops made without removing
it. With reversed double stitches, the thread is lifted over by the shuttle as the 2nd stitch is being made. Loops can also be made by putting the shuttle thread over the pin.

**Ovals**—Form the cotton of the shuttle you are directed to work with into a loop round the hand, and begin working the stitches. If composed of double stitches only (with perhaps one loop in the centre), it is called a *plain oval*. If of several loops, a *looped oval*.

**A Join**—Is always made by drawing the thread with which the stitches are worked through the specified loop or space, and passing the shuttle through the loop formed by the thread thus drawn through, making it equal in length to an ordinary loop. To make a join, 2 threads or an oval are necessary.

**To Tie**—This is done by drawing the thread on the shuttle with which you are working through the specified loop or space (or round some thread), and putting the same shuttle through the loop so formed, always drawing it *quite* tight. It may sometimes be necessary to do this with the other thread; but it is done in the same way, with *one* thread only, and always drawn quite tight.

**To Attach**—Proceed as in tying—only pass the shuttle round the second thread before putting it through the loop, and drawing tight. This ties in the second thread, which cannot be so securely done by ordinary joining.

3rd Row. Begin again by tying in the 1st L of last Row. With the plain shuttle thread round the little finger; L, 1 D tie to the next L of the 2nd Row; (1 D, L, 1 D tie to the next L of the 2nd row twice;)
1 D, L, 1 D, tie to the same L; [1 D, L, 1 D tie to the
next L of the 2nd Row twice] 1 D. tie to the next L of 2nd Row, and repeat to the end of the strip. Or this row may be worked without loops—if they are objected to.

To make a strong foundation for this edging. Take the plain shuttle, and tie to the foundation cotton of the ovals, twice, between each oval; or on either side of the ties in the 2nd Row.
Fill the shuttles with the same cottons as in the 1st Edging, and use the same pins. The courser sizes will make this edging an inch and a half deep. Tie the cottons together.

Begin an oval with the plain shuttle; 3 D, L, 3 D draw tight. With the plain shuttle thread work 4 D.

Begin a looped oval with the plain shuttle; 2 D (L, 2 D 5 times) draw very tight.

The Leaf. Begin a figured shuttle oval; 2 R D (L, 2 R D 5 times) join to the 3rd L of the last row of the Rosette; 2 R D (L, 2 R D 14 times) draw tight. At a little distance begin a plain oval with the figured shuttle;
3 D join to the thread of the Leaf under the join; 3 D
draw close. Begin a plain oval with the figured shuttle
quite close to the last; 3 D join to the thread under
the 9th L of the 14 of the Leaf; 3 D draw tight. Tie
round the foundation thread of the two plain ovals,
and leaving a short space of cotton, tie between the 4th
and 5th L's of the 14 of the Leaf; tie again below
the plain ovals and round the foundation thread of the
leaf.

[With the plain shuttle thread round the little finger,
4 D. Begin a plain shuttle oval, 3 D; L, 3 D draw
close. Work a similar figured shuttle oval, and tie round
its foundation thread. Repeat twice.] With the plain
shuttle thread, 4 D.

The Rosette. Leave a space of each cotton. Begin a
figured shuttle oval, 1 D (L, 1 D 7 times) draw close.
With the plain shuttle thread (L, 1 D 7 times). [Begin
a figured shuttle oval, 1 D (L, 1 D 3 times) join to the
centre L of last oval; 1 D (L, 1 D 3 times) draw tight.
With the plain shuttle thread (L, 1 D 7 times). Repeat
3 times.] Tie to the foundation thread of the 1st of these
ovals. Tie to the 1st L of the 1st 7. With the plain
shuttle thread round the little finger (L, 1 D tie to the
next L but one 11 times). Tie with the plain shuttle
thread to the 15th L of the leaf; 1 D tie to the next L but
one. Tie with the plain shuttle thread to the L of the
1st figured shuttle oval; 1 D tie to the next L but one.
Tie with the plain shuttle thread to the L of the 2nd
figured shuttle oval; 1 D tie to the next L but one,
[4 D. Begin a plain shuttle oval, 3 D, L, 3 D draw
tight. Begin a figured shuttle oval, 3 D join to the 1st
L of the last round of the Rosette; 3 D draw tight and
tie to its foundation thread. Repeat once, joining the
figured shuttle oval to the 2nd L of the Rosette,] 4 D.
Repeat to the required length, beginning with the looped
oval.

For the Foundation. Tie the threads together in the L
of the 1st plain shuttle oval, holding the work in the
hand and the right side up. With the plain shuttle
thread round the little finger (L, 1 D, 4 times) tie in the
3rd L of the next oval, (L, 1 D, 4 times) tie in the L of
the next oval, [(L, 1 D, 3 times) tie in the L of the next
oval. Repeat 3 times.] Repeat from the beginning till
all the ovals are finished.
Fill the plain shuttle with Evan’s Boar’s-head No. 18, and the figured with No. 30. Tie these threads together, Pin No. 3.

1st Leaf, 1st Row. With the plain shuttle thread round the little finger (L, 1 D 10 times) tie to the 9th L (L, 1 R D tie to the next L 8 times), 1 R D attach to the foundation thread under the 1st L, 2 D (L, 2 D 4 times).

2nd Leaf, 1st Row. (L, 1 D 9 times) tie with the plain shuttle thread to the 5th L (counting from the point) of the last Leaf. Turn the work, 1 R D tie to the 9th L (L, 1 R D tie to the next L 8 times) 1 R D attach to the foundation thread under the 1st L; 2 D (L, 2 D 4 times). Repeat the 2nd Leaf till a sufficient length is worked.

2nd Row. Tie to the foundation thread of the 1st Leaf of the 1st Row, and tie the threads together.
plain shuttle thread round the little finger 9 D. Begin a figured shuttle oval, 5 R D join to the 2 centre Ls of the four Ls; 5 R D draw close. With the plain shuttle thread 9 D tie to the foundation thread of the 2nd Leaf under the 1st L, and repeat.

3rd Row. Refill the shuttles and tie the threads together in the space under the last made oval; [2 D (L, 2 D 4 times) join to the space under the next oval. Repeat to the end of the work.]

Holding the right side of this strip upwards, tie to the 1st L: [with the plain shuttle thread round the little finger (L, 1 R D 9 times) turn the work. Begin
